SKILLS

Languages	TypeScript, JavaScript, Python, C#, Bash, SQL
Frontend	React, Next.js, Vue.js, Tailwind CSS, Bootstrap
Backend	Node.js, Express.js, NestJS, Django, ASP.NET Core, REST APIs, Odoo
Databases	PostgreSQL, MySQL, MongoDB, DynamoDB, Firebase
Cloud & Tools	AWS, Terraform, Docker, Kubernetes, Git/GitHub, Playwright, GitHub Actions, Postman, AI Tools
Spoken	English (TOEIC 845), Spanish (Basic)

WORK EXPERIENCE

LYSA/O'Work-OCI — Software Engineer	01/2024 – 08/2026
<i>Built and maintained O'Work — a multi-tenant ERP platform used for invoicing, workflow automation and enterprise operations</i>	
- Developed REST APIs and database interceptors enforcing business rules across 10+ ERP modules — e-invoicing, HR/payroll, document management and purchasing; ranked 2nd of 38 contributors on the platform - Built adapter-based integrations with Lucca, Esker and Cegid Flex to synchronize business data - Implemented French/EU Factur-X e-invoicing across all 5 compliance profiles (MINIMUM → EXTENDED) with XSD/Schematron validation, XML parsing/generation and Chorus Pro submission - Integrated Claude AI to automate invoice processing, VAT validation and email server configuration tasks - Added automated unit, Playwright E2E and database integration tests to a suite covering 30+ business flows	
MOR Software — Frontend Developer	09/2023 – 12/2023
- Led development of team training software using Next.js, Express, Tailwind CSS and Firebase - Built responsive React/Next.js and Tailwind CSS interfaces from Figma designs for Korean and Japanese client products	
KPIM JSC — Software Engineer	03/2023 – 08/2023
<i>Joined through the company internship program and later contributed to COMPACCLASS</i>	
- Designed and built internal prototype projects using Microsoft Power Apps and code-based development - Built maintainable RESTful APIs for COMPACCLASS with ASP.NET Core, validated by xUnit test suites	

FEATURED PROJECTS

Inter Prep — GitHub	06/2026 – 08/2026
<i>Learning platform — study tracks, spaced-repetition practice, progress analytics and AI coaching</i>	
Stack: AWS (Lambda, API Gateway, DynamoDB, S3, CloudFront, EventBridge), Terraform, NestJS, Microservices	
- Split a NestJS monolith into 5 microservices across 6 Lambdas, each deploying independently, cut hosting cost to ~\$0/month by replacing an always-on container with request-priced Lambda and DynamoDB - Automated per-service CI/CD with GitHub Actions OIDC — keyless credentials, path-filtered deploys, gated production - Served private content via time-limited S3 presigned URLs, and turned recruiting Gmail into filtered notifications and .ics reminders via EventBridge cron and LLM classification.	
SiteDoc AI — GitHub	05/2026 – 06/2026
<i>Website audit platform scanning public URLs for accessibility, SEO and performance</i>	
Stack: Next.js, NestJS, Playwright, axe-core, Lighthouse, AWS, GitHub Actions	
- Built Playwright scanning for desktop/mobile screenshots, console errors and failed requests, layering axe-core, Lighthouse and SEO checks into categorized results. - Used AI to summarize findings, rank high-impact issues and suggest developer-focused fix prompts - Developed shareable reports with scorecards, screenshots, filters, public links and audit history	
PyEz Learning — GitHub	11/2025 – 12/2025
<i>A multifunctional learning platform designed to motivate students through reward points, games and online competitions</i>	
Stack: Django, PostgreSQL/Neon, Google OAuth2, Cloudinary, PyMuPDF, OpenAI API	
- Built role-based dashboards and custom profiles for students, teachers and admins to manage learning activities - Generated quiz and exam question sets with OpenAI API to support faster content creation - Rendered Cloudinary-hosted PDF lessons page-by-page using PyMuPDF for online lesson viewing	

EDUCATION & CERTIFICATIONS

B.E. Computer Engineering — Hanoi University of Science and Technology	08/2019 – 12/2023
AWS Solutions Architect – Associate — Amazon	08/2026
Building with the Claude API — Anthropic	05/2026
CS50x — Harvard	03/2026
