WORK EXPERIENCE

LYSA/OWORK-OCI - Software Engineer 01/2024 - Present

Built and maintained **OWORK**, a multi-tenant ERP platform using Node.js, Odoo, and a custom JavaScript MVC framework

- Developed REST APIs and database interceptors to enforce business rules across ERP workflows
- Integrated bidirectional data synchronization with Lucca, Esker, and Cegid Flex using adapter-based architecture
- Implemented French/EU Factur-X e-invoicing features, including XML parsing, generation, and Chorus Pro integration
- Integrated Claude AI to automate invoice processing, VAT validation, and email server configuration tasks
- Built automated test suites covering unit, Playwright E2E, and database-level integration scenarios

MOR software - Frontend Developer 09/2023 - 12/2023

Contributed to 2 outsource projects using VueJS, NextJS, TailwindCSS...

- Led development of team training software using Next.js, Express, Tailwind CSS, and Firebase
- Built responsive React and Tailwind CSS interfaces from Figma designs for a Korean education platform
- Designed and developed a Japanese mobile/web application, focusing on clean UI and user-friendly workflows

KPIM JSC - Software Engineer 03/2023 - 08/2023

Participated in the company internship program, then contribute to company's software **COMPACCLASS**

- Analyzed system design and built own idea projects using Microsoft Power Apps and code-based development
- Developed clean, maintainable RESTful APIs for COMPACCLASS using .NET Core and scalable backend practices
- Created xUnit test cases to validate API behavior and improve overall code reliability

EDUCATION

Hanoi University of Science and Technology - HUST 08/2019 - 04/2024

Bachelor - Computer Engineering

SKILL

Core Skills	NodeJS (4 years)	ReactJS (4 years)	CI/CD (2 years)	Spring Boot (2 years)
	ASP.NET (2 years)	SQL (4 years)	Django (3 years)	VueJS (2 years)
Tools	Git/GitHub	Postman	Elasticsearch	Kubernetes
	Docker	Claude Code	Odoo	Copilot
Languages	English (TOEIC 845)			
	Spanish (Basic)			

HIGHLIGHT PROJECT

SiteDoc AI

05/2025 – 06/2026

AI-powered website audit platform that scans public URLs and generates reports for accessibility, SEO, performance...

Technologies: NextJs, NestJS, Playwright, axe-core, Lighthouse, PostgreSQL, GitHub Actions

- Built Playwright scanning to capture desktop/mobile screenshots, console errors, and failed network requests
- Integrated axe-core, Lighthouse, and SEO checks to generate categorized, actionable audit results
- Used AI to summarize findings, rank high-impact issues, and suggest developer-focused fixes
- Developed shareable reports with scorecards, screenshots, filters, public links, and audit history

[GitHub](#) [View project](#)

PyEz Learning

11/2025 – 12/2025

A multi-functional learning application inspire students by using reward points, games, and online competitions

Technologies: Django, PostgreSQL/Neon, Google OAuth2, Django Allauth, Cloudinary, PyMuPDF, OpenAI API

- Built role-based dashboards for students, teachers, and admins to manage learning activities
- Integrated Google OAuth2 with custom profiles, role-based access control, and secure account workflows
- Rendered Cloudinary-hosted PDF lessons page-by-page using PyMuPDF for online lesson viewing
- Generated quiz and exam question sets with OpenAI API to support faster content creation

[GitHub](#) [View project](#)

Music Restaurant

09/2023 – 10/2023

A full-stack music streaming and playlist management application

Technologies: NextJS, Tailwind CSS, Express, PostgreSQL, Vercel, Cloudinary, YouTube API, JWT, Swagger

- Built authentication, playlist creation, music search, and playback features
- Integrated YouTube search to help users discover songs and add tracks to playlists
- Implemented Cloudinary uploads for playlist covers and user avatars with secure backend signatures
- Deployed frontend and backend separately on Vercel with PostgreSQL and API documentation

CERTIFICATE

Building with the Claude API - Anthropic

05/2026

Technical training covering prompt engineering, MCP deployment, prompt caching, and RAG workflows

[View certificate](#)

CS 50x - Harvard

03/2026

Harvard's introductory computer science course covering C, Python, SQL, JavaScript, algorithms, and fundamentals

[View certificate](#)
