WORK EXPERIENCE

LYSA/OWORK-OCI

01/2024 - Present

Software Engineer

- Built and maintained **OWORK** - an ERP platform using Node.js, PostgreSQL and custom JavaScript MVC framework
- Developed REST API endpoints and database interceptors enforcing business rules across UI, API
- Integrated bidirectional data sync with Lucca, Esker, and Cegid Flex using a pluggable adapter architecture
- Implemented French/EU Factur-X electronic invoicing compliance, including XML parsing, generation and Chorus Pro
- Integrated Claude AI to handle tasks such as regexp for invoices, VAT and email server configuration...
- Wrote automated test suites covering unit, Playwright E2E and database-level integration scenarios across modules

MOR software

09/2023 - 12/2023

Front-end developer

- Learned deeply about JavaScript, React and framework: NextJS, VueJS
- Completed a team training software as a leader using Nextjs, Express, Tailwind, Firebase...
- Contributed to 2 outsource projects and completed with excellence and punctuality.

KPIM JSC

03/2023 - 08/2023

Software Engineer

- Participated in the company's intern training program, analyzed system design and built my own idea projects based on 2 development kinds (MS low-code Power Apps and code).
- Contributed to the company's software **COMPACCLASS** using .Net core, xUnit

EDUCATION

Hanoi University of Science and Technology - HUST

08/2019 - 4/2024

Bachelor - Computer Engineering

SKILL

Core Skills

NodeJS (4 years)

ReactJS (4 years)

CI/CD (2 years)

Django (3 years)

ASP.NET (2 years)

SQL (4 years)

Spring Boot (2 years)

VueJS (2 years)

Tools

Git/Github

Postman

Elasticsearch

Antigravity

Docker

Claude Code

Odoo

Copilot

Languages

English (Fluent)

Spanish (Intermediate)

HIGHLIGHT PROJECT

PyEz Learning

11/2025 - 01/2026

A multi-functional learning application using Django, OAuth2, Cloudinary...

- PDFs are fetched from Cloudinary, converted page-by-page using PyMuPDF, and streamed as base64 JSON
- Student code runs via Python's built-in `exec()` with isolated namespaces — no sandbox service needed.
- Achieved rapid and comprehensive results and create question sets with the help of AI

[View project](#)

Stream Music

09/2023 - 10/2023

A music player application using NextJS, Express, Firebase, Docker...

- The music playback, download, upload, and search functions all work smoothly and stably
- Used Firebase to store photos, 3rd party APIs to find and download music...
