WORK EXPERIENCE

LYSA/OWORK-OCI — Software Engineer

01/2024 – Present

Built and maintained **OWORK** a multi-tenant ERP platform used for invoicing, workflow automation and enterprise operations

- Developed **REST APIs and database interceptors** to enforce business rules across ERP workflows
- Built adapter-based integrations with Lucca, Esker and Cegid Flex to synchronize business data
- Implemented French/EU **Factur-X e-invoicing** features, including XML parsing, generation and Chorus Pro integration
- Integrated **Claude AI** to automate invoice processing, VAT validation and email server configuration tasks
- Added automated unit, **Playwright E2E** and database integration tests to improve release reliability

MOR Software — Frontend Developer

09/2023 – 12/2023

- Led development of team training software using **Next.js, Express, Tailwind CSS** and **Firebase**
- Built responsive React/Next.js and Tailwind CSS interfaces from **Figma** designs for Korean and Japanese client products

KPIM JSC — Software Engineer

03/2023 – 08/2023

Joined through the company internship program and later contributed to **COMPACCLASS**

- Designed and built internal prototype projects using **Microsoft Power Apps** and code-based development
- Built maintainable **RESTful APIs** for COMPACCLASS with **ASP.NET Core**, validated by **xUnit** test suites

FEATURED PROJECTS

Interview Prepare — [GitHub](#)

06/2025 – 08/2026

Learning platform — study tracks, spaced-repetition practice, progress analytics and AI coaching

Stacks: AWS (Lambda, API Gateway, DynamoDB, S3, CloudFront, EventBridge), Terraform, NestJS, Microservices

- Split a NestJS monolith into **5 microservices across 6 Lambdas**, each deploying independently, cut hosting cost to ~\$0/month by replacing an always-on container with request-priced **Lambda** and **DynamoDB**
- Automated per-service CI/CD with **GitHub Actions OIDC** — keyless credentials, path-filtered deploys, gated production
- Served private content via time-limited **S3 presigned URLs**, and turned recruiting Gmail into filtered notifications and .ics reminders via **EventBridge** cron and LLM classification.

SiteDoc AI — [GitHub](#)

05/2025 – 06/2026

Website audit platform scanning public URLs for accessibility, SEO and performance

Stacks: Next.js, NestJS, Playwright, axe-core, Lighthouse, AWS, GitHub Actions

- Built **Playwright** scanning for desktop/mobile screenshots, console errors and failed requests, layering **axe-core**, **Lighthouse** and SEO checks into categorized results.
- Used **AI** to summarize findings, rank high-impact issues and suggest developer-focused fix prompts
- Developed shareable reports with scorecards, screenshots, filters, public links and audit history

PyEz Learning — [GitHub](#)

11/2025 – 12/2025

A multifunctional learning platform designed to motivate students through reward points, games and online competitions

Stacks: Django, PostgreSQL/Neon, Google OAuth2, Cloudinary, PyMuPDF, OpenAI API

- Built role-based dashboards and custom profiles for students, teachers and admins to manage learning activities
- Generated quiz and exam question sets with **OpenAI API** to support faster content creation
- Rendered Cloudinary-hosted PDF lessons page-by-page using **PyMuPDF** for online lesson viewing

SKILLS

CORE

Node.js/NestJS, React/Next.js, Vue.js, SQL, Odoo, Django, ASP.NET

CLOUD & TOOLS

AWS, Terraform, Docker, Kubernetes, Git/GitHub, Playwright, Postman, AI Tools

LANGUAGES

English (TOEIC 845), Spanish (Basic)

EDUCATION & CERTIFICATIONS

Hanoi University of Science and Technology HUST — B.E. Computer Engineering

08/2019 – 12/2023

AWS Solutions Architect – Associate — Amazon | Scheduled 08/2026

In progress

Building with the Claude API — Anthropic

05/2026

CS50x — Harvard

03/2026
